FloorballPlanet has the most affordable high quality floorball rink boards in the country.

Two different sizes of straight segments (2m and 1 m) provides for ultimate flexibility.

Flat top rails and interlocking connectors for a clean and sturdy layout.

- A standard floorball rink is 40m x 20m with rounded corners. There are 52 straight panels (2m x .5m) and 8 corner segments. Panels are manufactured of high strength polypropylene with sophisticated molecular welding technology. Wheeled trolleys (2 per rink) are included for easy movement and storage.
- In addition to a regulation rink (40m x 20m) we offer two other standard configurations. A 30m x 15m (98' x 49') is ideal for 4 v 4 plus goalies and will fit in most gyms. This is the standard size for Special Olympics Unified competition and comes with 36 straight segments, 2 short segments, 8 corner segments and 2 trolleys. A smaller 20m x 10m (65' x 33') configuration is ideal for 3 v 3 and small game situations. It comes with 22 straight segments, 8 corner segments and 1 trolley.
- An extra set of corners may be purchased so that you may assemble two smaller floorball rinks from a full-size. This is a hugely popular feature where many facilities are not large enough to fit a full regulation rink.
- Not exclusive to floorball. These versatile boards can be used as borders for a variety of sports!
- Have a unique situation? Purchase individual segments to fit your needs.
- Pricing, FOB Dallas-Fort Worth (pricing same for black instead of white):
